BPA-free

No plasticiser

No toxic chemicals

absolutely eco-friendly & safe.

Safe for acidic drinks like coffee, herbal
tea, juice...

FDA & EU food safe grade compliance

FDA

SGS

CE

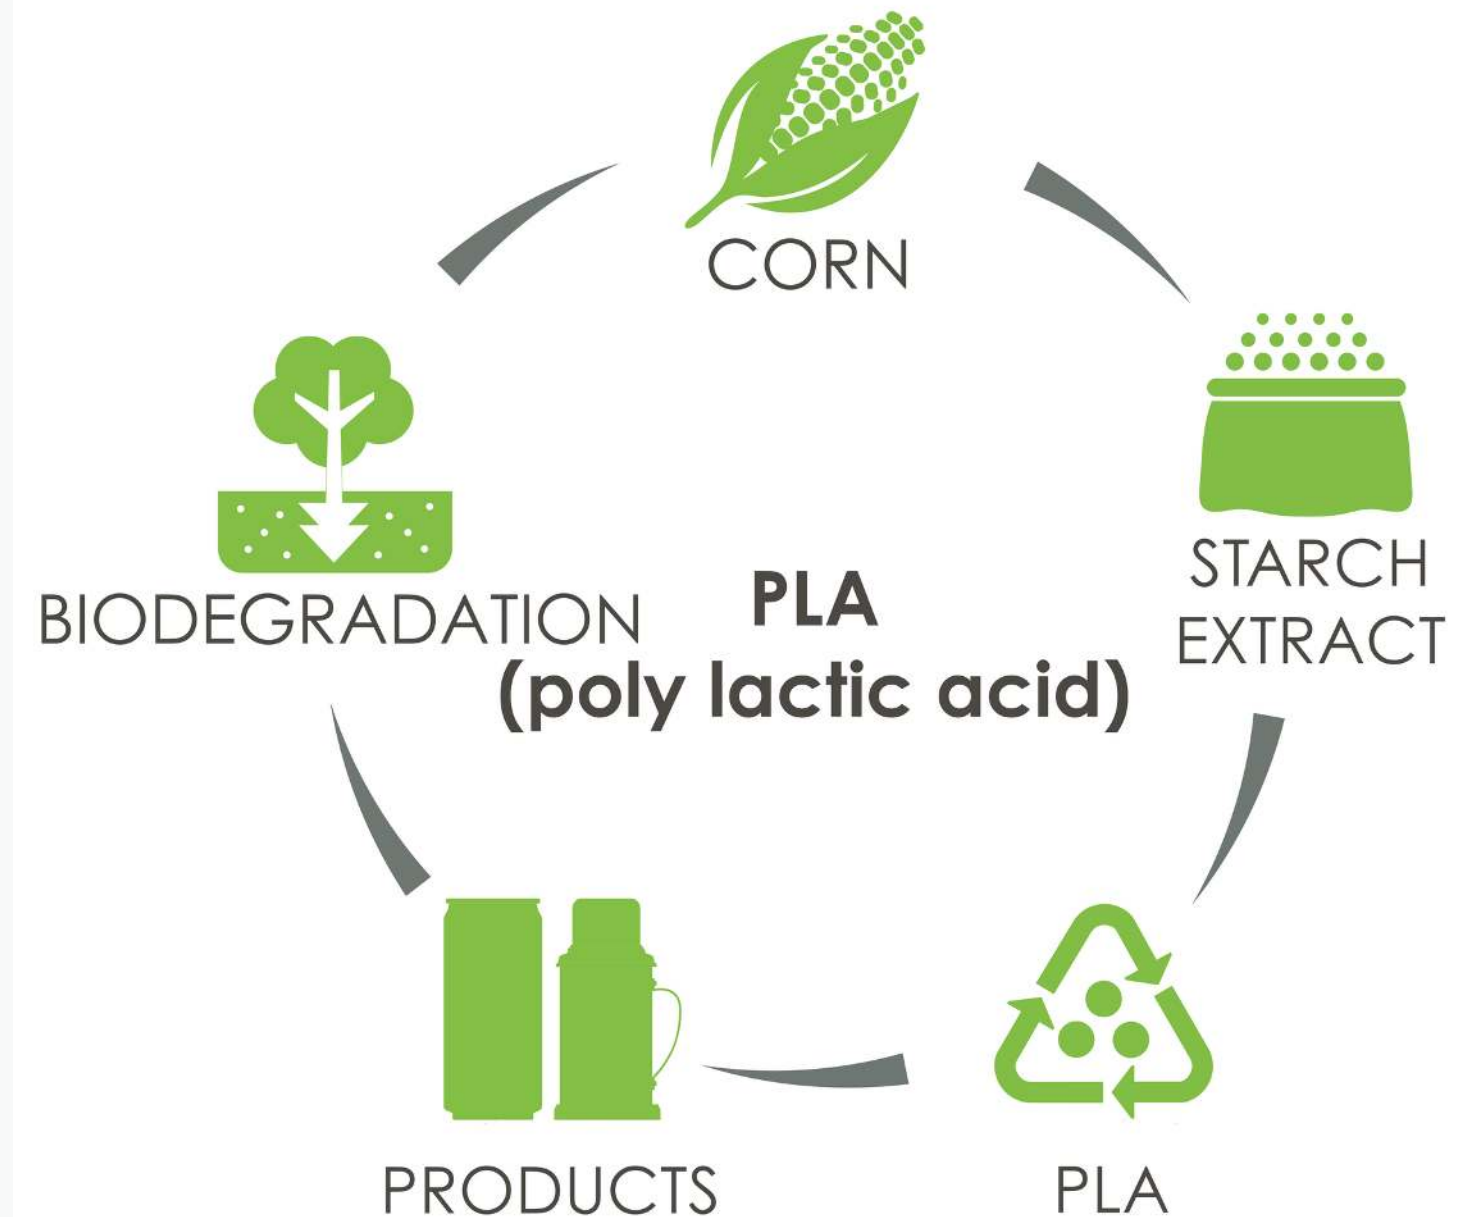

Biodegradable Compostable

It is biodegradable under specific composting environment.

Thanks to the natural properties of the material, it can then become compost which can be used as fertiliser for growing crops or plants.

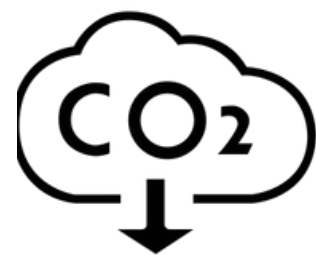

Petroleum-base plastic is NEVER biodegradable nor compostable.

Less Carbon Emission

The mug is ECO starting from the production of the material.

60% less carbon emission during production of PLA (poly lactic acid) compares to that of petroleum-base plastic.

Durable Anti-bacterial

Material will get weakened after 2 years,
i.e. it might crack easier compares to when
you first bought it.

It also means we do not cheat you on the
material, it is truly plastic-free.

For hygiene reason, any tableware is
advised to be changed after 2 years.

Do not dispose mug into the recycling bin.
It is no.7 classified.

*** NEW ***

Spill-proof Lid

With a drink hole on lid top, with a silicone tab to perform spill-proof function.

Silicone is of food safe grade compliance to FDA / EU standard

Leak-proof lid

No drink hole on lid top.
A screw-type lid provides a total leak-proof function.

LEAK PROOF

Screw Lid

Provide a spill-proof or leak-proof function, depends on the lid structure.

You can carry your mug around.

Make it a more portable mug.

Smooth & glossy finishing

The entire mug is done professionally with smooth glossy finishing.

Premium quality compares to the regular plastic mugs you find at the hypermarket.

Perfect Size

Capacity: 400ml

Product size: 80mm Dia* 148mm H

Good for a TALL-size coffee, tea or chocolate.

Ergonomic shape, easy to hold and bring around wherever you go.

Easily fit into the car console. Enjoy your drink when you drive.

Put it in the side pocket of the backpack, keep it upright when on the go.

ECO Packaging

Brown kraft paper without any plastic lamination to make it recyclable.

Minimal use of paper to reduce waste.

THANK YOU!

Be the leader to make a greener world
with less plastic.
